DESIGN GRID

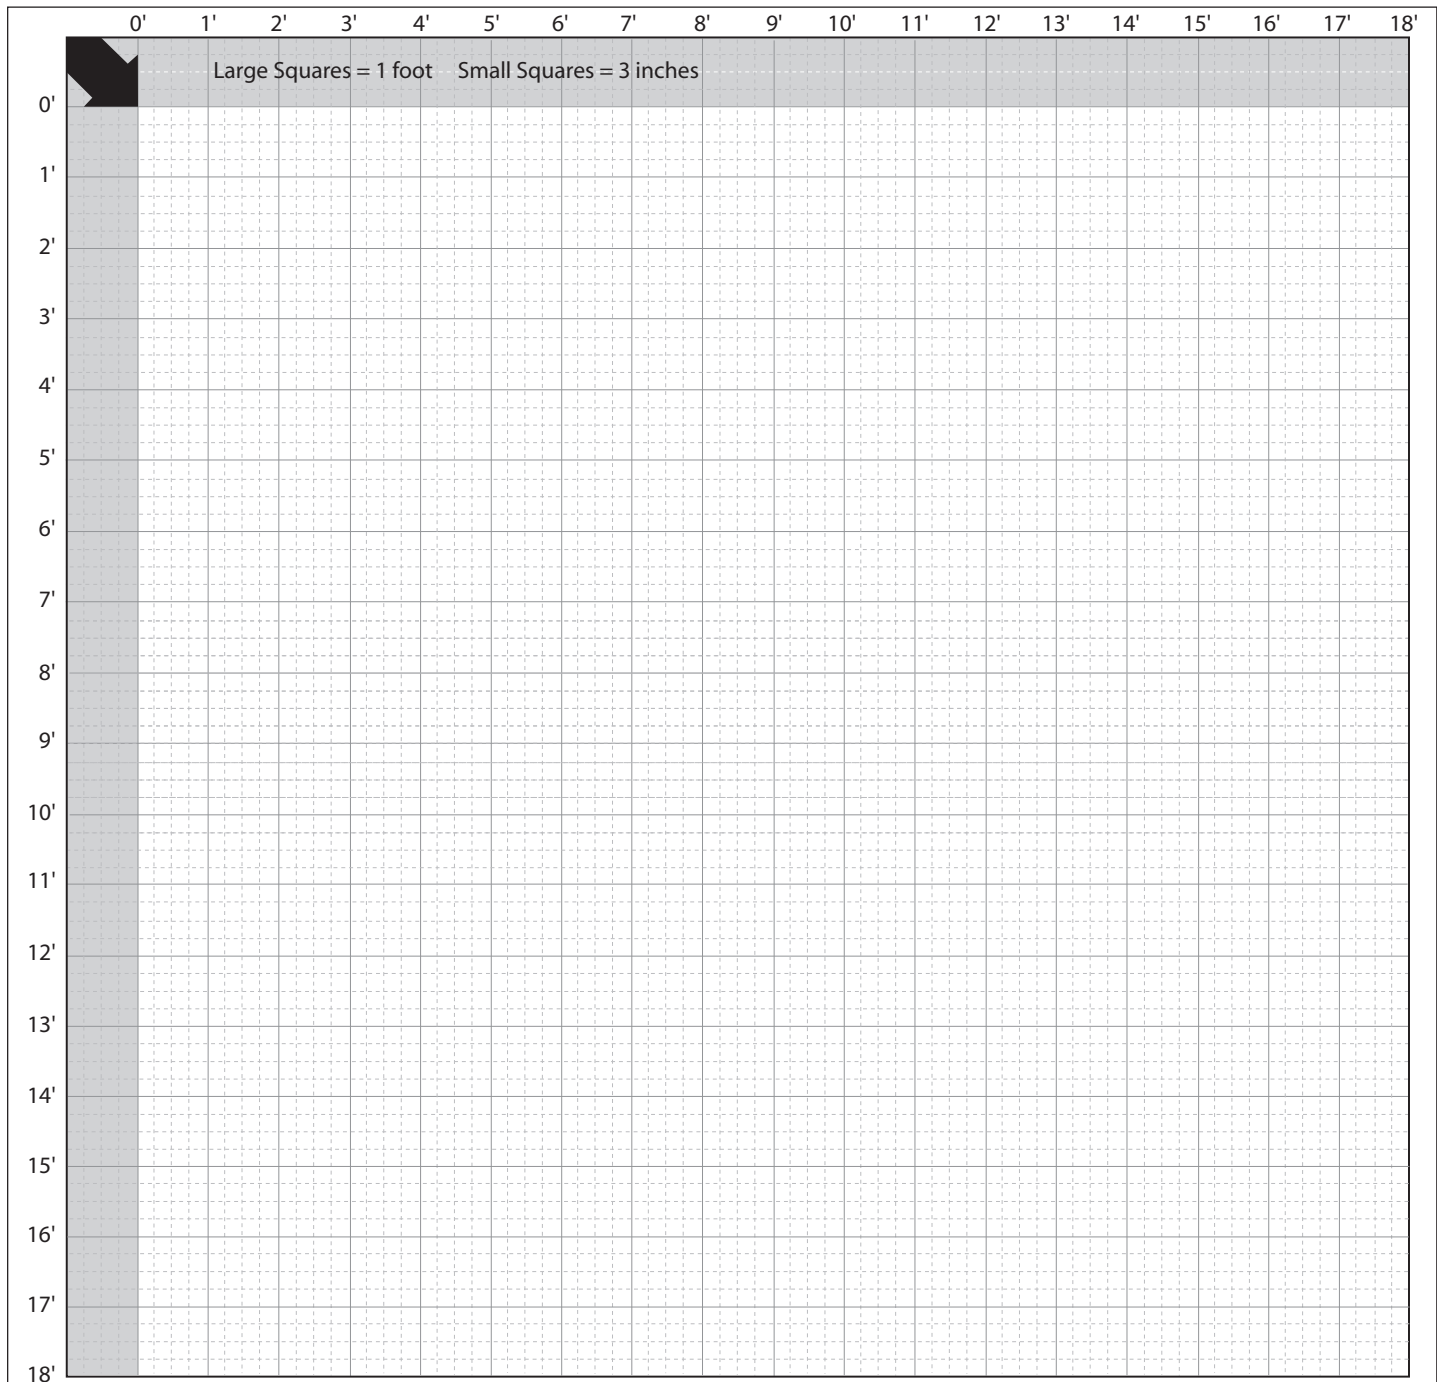

Use the grid below to layout your new space.
Give your design to us to get started.

Measuring Up Your Layout

Remember to always measure from the outside edge of the door and window trim. Ensure you include all accurate wall measurements.

1. Using the grid supplied to sketch an overhead view of your space. Start at the 0,0 position (upper left corner) and draw outward.
2. Start in the corner of the room and measure the overall dimension of your walls. Write the measurement, in inches, on the shaded area of the grid.
3. Mark the location of all windows and doors noting their width and height including trim.
4. Draw in major appliances noting their outside width, height and depth.
5. Mark the position of plumbing, gas and electrical outlets.
6. Draw in your cabinets and label each one with their corresponding item #.
